CONSERVATION

Flood Watch

Flood Watch - Update

A **Flood Watch** is issued when there is a **potential for flooding** to occur in low-lying areas. **Nuisance or minor flooding** of access roads, backyards, basements, etc. is anticipated. **Buildings/people are not at risk.**

DATE: May 4, 2018

TIME: 1:00 PM

ISSUED TO: Municipalities (Quinte West, Trent Hills), Northumberland & Hastings Counties, Ministry of Natural Resources & Forestry, Parks Canada – Ontario Waterways, Ontario Power Generation, Innergex, Media, Health Units, Emergency Response Agencies

MESSAGE #: LTC – 18 – 12

Valid until Friday, May 11, 2018

Lower Trent Conservation advises municipalities and the public that a **Flood Watch** remains in effect for the **Trent River from Hastings to Trenton**. There is **potential for flooding** to occur in low lying areas adjacent to the river with **minor flooding of access roads, backyards and basements possible**.

Residents living along the Trent River within the Municipality of Trent Hills and the City of Quinte West should expect continued springtime water flows and levels over the next week.

Parks Canada – Ontario Waterways (Trent-Severn Waterway) is making daily operational changes to accommodate today's precipitation along with the runoff from snowmelt in the northern part of the Trent watershed (Minden/Haliburton areas). Residents should ensure their sump pumps are in working order and secure personal property (boats, docks, etc.) along the river banks.

Water flows to date being seen on the river are considered typical springtime conditions. The approximate peak flows for the last six years are shown below.

Year	Healey Falls (cubic metres/second)	Glen Ross (cubic metres/second)
2013	400	520
2014	525	690
2015	200	260
2016	400	525
2017	470	628
2018 (to date)	402 (on April 23)	552 (on May 1 st)

... 2

The public is urged to use extreme caution around all watercourses due to strong currents, cold water temperatures, and slippery stream banks. Parents and caregivers are advised to keep children and pets away from all waterways. Areas around dams, culverts and bridges should be avoided at all times.

Lower Trent Conservation monitors water levels and weather forecasts closely as part of its flood forecasting and warning program. Daily water level information is available at www.ltc.on.ca. If you have concerns about water levels, please contact Lower Trent Conservation at (613) 394-4829.

This Flood Watch will be in effect until Friday, May 11, 2018 and will be updated earlier if conditions warrant.
