LOWER TRENT
CONSERVATION

Water Safety Statement

Water Safety Statement

DATE: November 27, 2019

TIME: 10:45 AM

ISSUED TO: Municipalities (Alnwick/Haldimand, Brighton, Cramahe, Quinte West), Northumberland & Hastings Counties, Ministry of Natural Resources & Forestry, Media, Health Units, Emergency Response Agencies

MESSAGE #: LTC – 19 – 31

Valid until Saturday, November 30, 2019

A **Water Safety Statement** is issued during high flows, unsafe banks, melting ice or other factors that could be dangerous for recreational users such as anglers, canoeists, hikers, children, pets, etc. **Nuisance localized shoreline flooding for some may occur. There is also potential for further erosion on already damaged shorelines.**

A system is forecast to move into the Province today and bring strong winds across Lake Ontario. Winds will begin from the southeast then shift to southwest. Sustained winds across Lake Ontario are forecast to exceed 50 km/hr with gusts over 90 km/hr. These strong winds are forecast to result in storm surge with waves exceeding 2 metres along the north shore of Lake Ontario beginning Thursday during the day and continuing into Friday. Surge related flooding and erosion damage from high waves is possible during these periods of strong onshore winds. Residents should pay close attention to weather forecasts for approaching storm systems with high southeast, south or southwest winds.

Lower Trent Conservation monitors water levels and weather forecasts closely as part of its flood forecasting and warning program. Daily water level updates are available at www.LTC.on.ca. If you have concerns about water levels, please contact Lower Trent Conservation at (613) 394-4829. This Watershed Safety Statement will be in effect until (or updated before) Saturday, November 30, 2019.
